

**KEITH D. JORGENSEN, MD, PA  
44 BIRCH STREET, SUITE 304  
DERRY, NH 03038  
(603) 432-8104**

**DISCHARGE INSTRUCTIONS FOR ADENOIDECTOMY**

- Encourage liquids on the first day, soft diet in the evening and regular diet beginning the second day.
- The patient should remain quiet for one week.
- Avoid nose blowing
- Take medications as prescribed by the surgeon. Be aware that some prescription pain medications may contain the same active ingredients as over-the-counter pain medications and should not be duplicated.

**WHAT TO REPORT TO YOUR PHYSICIAN:**

- Visible signs of bleeding from the nose
- Vomiting of bright red blood
- Temperature rising to 101 degrees after 2 or 3 days (slight fever of 99 to 100 degrees for 1 to 2 days is a common occurrence).
